

5th Active House Symposium

Villa Alba – Lake Garda – Italy, 14-15 November 2016

INTRODUCTION

The 5th Active House Symposium will discuss sustainable building design in an international and national perspective with Italian and International architects and designers.

There will be specific focus on sustainable development on city and building level, as well as focus on indoor comfort issues and the Active House principles, including the development of the Active House Label.

The symposium will be set up by the international Active House Alliance together with ActiveHouseItaly and is classified as a part of the Italian education program for architects and follow their national education program, giving architects education credits for participating. There will be simultaneous translation between Italian and English.
